TRON1

Voice Interaction Kit

Equipped with NVIDIA NX module and high-fidelity microphone array, TRON 1 supports voice wake-up, speech control, enhancing human-like interaction and adaptability across diverse scenarios—ideal for embodied AI education, guided narration, and interactive exhibitions.

Supports customizable wake words and offline command sets; compatible with deployment of various LLM for multilingual and multi-scenario voice interaction.

Built-in AI Voice Interaction Framework: for navigation/Q&A development.

Rich Open-Source Examples: For faster onboarding and lower development barriers and fast-track your projects.
